Re: Potential Spruce Ridge North Drainage Improvements

Dear Fellow Town of Pompey Resident:

As you may know, your home is located within the Town of Pompey Spruce Ridge North Drainage District ("Drainage District"). This and other drainage districts were established by the Town as part of the subdivision process to comply with NYSDEC SPDES (State Pollutant Discharge Elimination System) Permit regulations related to stormwater runoff. Pursuant to state law, any costs for improvements made within drainage districts are to be assessed solely against the properties located therein.

In recent years, flooding and significant erosion have posed increasingly larger problems for areas north of Broadfield Road. These issues have resulted in damage to private property, created increased safety concerns for some residents and loss of property due to erosion.

To address the flooding and erosion issues, the Town (on behalf of the Drainage District) is evaluating the potential of making drainage improvements between Broadfield Road and Red Spruce Lane just west of Twin Pines Drive. The proposed improvements would include construction of an approximately 600 linear feet drainage channel and repair/stabilization of approximately 400 linear feet of streambank, assuming all required access approvals can be secured. Pursuant to state law, the costs must be charged equally to all Drainage District property owners.

You are cordially invited to attend an informational meeting at Town Hall (8354 Route 20) on Thursday, May 9, 2019, at 6 p.m. where Town officials will further explain the drainage problems, detail our proposed solution and review the projected costs. We encourage you to attend and provide your feedback on whether the Town should proceed with this project.

If you are unable to attend the meeting, please email me any questions or comments you have to cmarsh3877@gmail.com.

Thank you.

Sincerely,

Carole Marsh, Supervisor
